

## CSCI-5007 Details

### Course Information

CSCI-5007 is a 3-hour internship course. It counts for general, upper division elective credit (it cannot take the place of one of your CSCI electives). You can sign up for the course if you have a CS-related internship at a company. Please note: if you are taking 5007 in the summer, you will have to pay summer tuition to enroll.

### Course Requirements:

- 1) There will be biweekly write-ups. Typically, these are about one page in length. In these write-ups, you will explain how the internship is going (brief overview of what you're working on, what has been good, what hasn't worked so well, etc). At the start of the semester, I will send the deadlines for each of these write-ups.
- 2) At the end of the semester, your supervisor will fill out a brief evaluation form (provided by me) and return it to me through email. **You will need to check to make sure your employer is okay filling out an evaluation before enrolling in 5007.** If they won't fill out the evaluation, I cannot give a passing grade in the course.
- 3) Respond to all course emails in a timely manner. Do not expect reminders for the biweekly write-ups. It is your responsibility to submit them on time and follow the directions.

### How to get cleared:

If you are interested in the course, you will need to fill out an independent study form. Include your supervisor's contact information and what you will do at the company and then bring it to me for signature and clearance. Also, print out this course requirements document and sign the bottom. If I am not in my office, you can slide both forms under my door in Boyd 215 or e-mail at [bjb211@uga.edu](mailto:bjb211@uga.edu).

If you include your email address, I will notify you when you are cleared to register.
